

Local scientists gain recognition

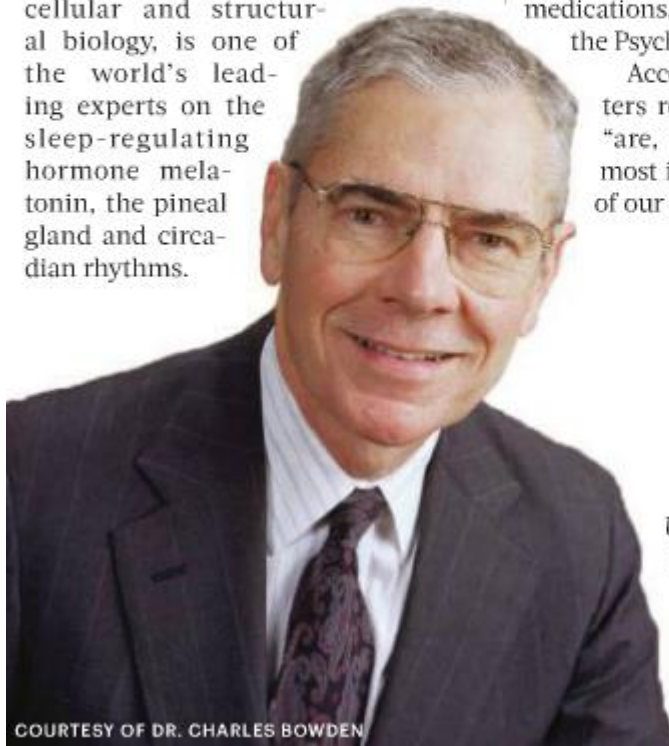

Russel Reiter, Ph.D., and Dr. Charles Bowden, researchers at the University of Texas Health Science Center at San Antonio's School of Medicine, have earned spots on Thomas Reuters' World's Most Influential Scientific Minds of 2014 list.

Reiter, a professor in the Health Science Center's department of cellular and structural biology, is one of the world's leading experts on the sleep-regulating hormone melatonin, the pineal gland and circadian rhythms.

He has been recognized among the standouts in Reuters' Biology/Biochemistry category.

Bowden, a clinical professor in the Health Science Center's departments of psychiatry and pharmacology, is an internationally respected authority on bipolar disorder and mood-stabilizing medications. He has been recognized in the Psychiatry/Psychology category.

According to the Thomas Reuters report, Reiter and Bowden "are, undoubtedly, among the most influential scientific minds of our time."
